

Your trusted laboratory for  
**quality results**

**WARNEX**  
ANALYTICAL SERVICES

# Analytical Expertise at Your Service

Warnex is a life sciences company devoted to protecting public health by providing contract laboratory services, including analytical, bioanalytical and medical laboratory services. Warnex Analytical Services provides a variety of quality control tests and consulting services to the pharmaceutical, biotechnology, cosmetics, veterinary, nutraceutical and natural health products industries. Our state-of-the-art facilities in Laval as well as our Neopharm Laboratories division in Blainville are fully GMP-compliant and meet the highest quality standards.

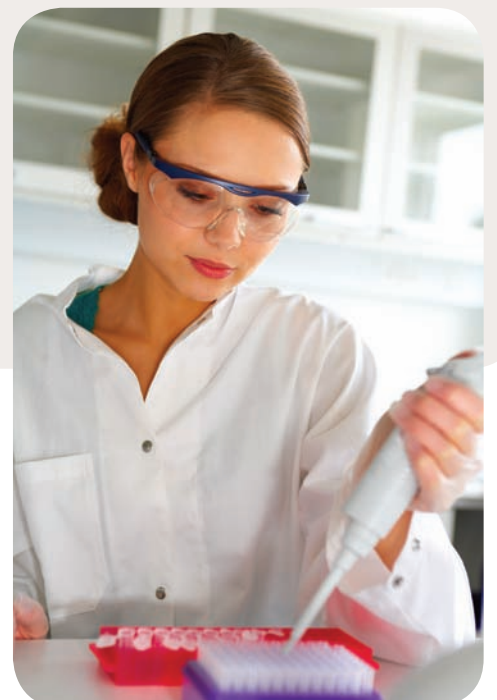

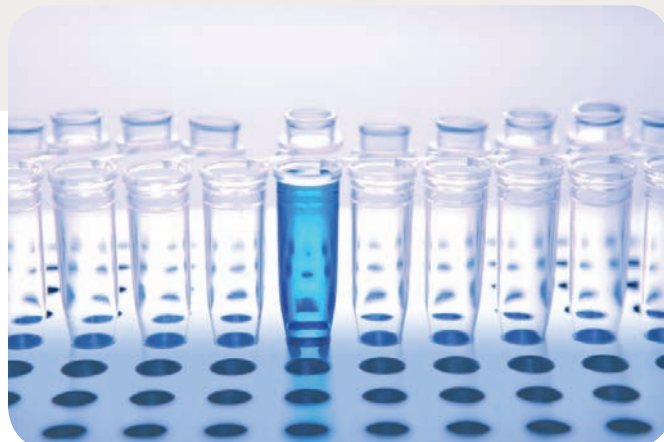

Warnex Analytical Services provides a wide range of quality control tests on raw materials as well as finished products. We offer a full range of ICH stability conditions and provide total stability management. In addition, we develop and validate new methods, revalidate existing methods to ensure compliance with current regulatory requirements and perform technology transfers. We also offer manufacturing validation services as well as quality assurance consulting.

## **Chemistry & Chromatography**

Our team of scientists uses a wide range of methods to test both raw materials and finished products in accordance with compendial procedures as well as in-house and client-supplied methods. Our analysts can assist you with numerous routine and specialized techniques and provide support for NDA, ANDA, and IND submissions. Our state-of-the-art facilities include a fleet of HPLC, UPLC and GC equipment.

## **Microbiology & Sterility Testing**

Warnex offers microbiology and sterility testing to help ensure the safety of various products and ingredients, including pharmaceuticals, cosmetics, personal care products, vitamins, water, veterinary products, natural health products, etc. All analyses are performed in compliance with cGMP requirements using methods from relevant compendia and pharmacopoeia.

# Committed to quality results

## Storage & Stability

Warnex offers a comprehensive stability program to meet our clients' needs. Our chambers, which are fully mapped, qualified, and validated, meet ICH guidelines and can also provide special storage conditions customized to a client's specific needs. A dedicated staff and specifically designed software provides total management of stability programs including timely reports, interpretations and recommendations. Warnex also has a Level 8 narcotics vault for narcotics stability studies. Storage is available for short-term and long-term durations, alone or with analyses.

## Method Development & Validation Services

Using our analytical expertise and advanced technologies, Warnex develops and validates methods for raw materials, APIs, finished products and cleaning validation. From dosage of active ingredients to degradation and dissolution studies, our team of specialists can assist our clients in meeting their specific needs. We also offer manufacturing validation services for the validation and qualification of equipment, systems, utilities, processes, laboratory instrumentation and computerized systems. Our experienced team of specialists will assist you in meeting increasing qualification and validation regulatory requirements in the global marketplace.

## Certifications

- Inspected by the U.S. Food and Drug Administration (FDA)
- Certified by Health Canada's Health Products and Food Branch Inspectorate (HPFBI)
- Controlled Drugs and Substances Licence

## QA Consulting

Warnex offers consulting services for quality assurance and regulatory requirements to the pharmaceutical industry. We assist our clients in various aspects of their quality assurance programs, including assisting them in meeting GMP requirements, developing Standard Operating Procedures (SOP), preparing for regulatory inspections and managing product and licence submissions.

## Natural Health Products

Warnex offers analytical and consulting services for natural health products and dietary supplements to assist clients with compliance to current regulations. In addition to chemical and microbiological analyses of these products and ingredients, we offer regulatory consulting and technical writing services.
